New York, NY (open to relocation) • kv.s.ghumaan@gmail.com • +1-317-730-2557
linkedin.com/in/kvghumaan • github.com/kghumaan • ghumaanventures.com

Site reliability and platform engineer with 8+ years building and operating secure, compliance-grade systems in financial services. Currently founder of a studio building AI agent infrastructure and consulting on full-stack engineering. Strong on Kubernetes, observability, IaC, and incident response, with a track record of cutting downtime and delivering large-scope projects on tight regulatory timelines.

EXPERIENCE

Ghumaan Ventures, LLC, Remote

Jan 2026 – Present

Founder & Engineer

- **Phera (phera.io)**: Building a WhatsApp-native coordination platform for multi-day Indian weddings. Architected around a Whapi.Cloud gateway after evaluating WhatsApp Business API constraints; Next.js + Supabase backend with row-level security for multi-tenant planner workspaces.
- **Lobstir (lobstir.ai)**: Building a multi-tenant AI agent orchestration platform. Designed the OpenClaw security model where each tenant runs in an isolated Docker container with its own gateway, credentials, and tool permissions, enforcing per-tenant trust boundaries by construction. Stack: TypeScript, Hono.js, Docker, multi-provider LLM routing.
- **Terracor (consulting engagement)**: Lead React Native engineer building the mobile client for a diamond-industry application; owning the full mobile codebase from architecture through release.

Perella Weinberg Partners, Los Angeles, CA

Jul 2024 – Nov 2025

Director, DevOps Engineering

- Architected and shipped Nexus, an end-to-end identity lifecycle platform processing every employee onboarding and offboarding firm-wide, replacing a planned \$500K, 18-month external engagement with an in-house build delivered in 6 months under a compliance-mandated 24-hour SLA.
- Built secure Azure infrastructure integrating Workday, Active Directory, and Entra ID using Functions, Cosmos DB, Event Hubs, and service-based auth with zero internet exposure; partnered daily with network security to maintain a hardened posture.
- Engineered TeamsGPT, a self-hosted Azure AI chatbot serving the firm with 80% adoption and hundreds of daily conversations; kept all data inside the security perimeter using Cosmos DB and Redis.
- Partnered with SOX auditors and Big 4 consulting firms on controls; maintained detailed audit trails and comprehensive test suites enforced as CI/CD deployment gates.

Ares Management, Los Angeles, CA

Jul 2019 – Jul 2024

Senior Engineer, DevOps

- Led Ares-Middleware, a Python-based automation platform integrating 20+ internal systems across HR, Corporate Finance, and Investment teams with hundreds of automated runs daily; tech-led a team of 4 engineers across the US and India.
- Migrated the platform from on-premises to Azure Kubernetes Service using Helm, achieving a 90% reduction in downtime, 2x faster deployments, and a substantially improved monitoring and alerting posture.
- Built an Azure data lake with Data Factory and Event Hubs ingesting gigabytes of daily data from corporate systems; produced curated datasets feeding Power BI dashboards used by executive stakeholders.
- Adopted Terraform and Bicep for IaC across environments, established GitOps workflows in Azure DevOps, and standardized CI/CD pipelines across teams.

General Motors, Austin, TX

Aug 2018 – Jul 2019

Software Engineer

- Built backend Java services and a WebSocket-over-Redis layer powering real-time, multi-user interactions on the 2020 Corvette Z06 3D vehicle configurator.

SKILLS

Cloud & Infra: Azure (AKS, Functions, Cosmos DB, Event Hubs, Data Factory, App Insights, Blob, OpenAI), Docker, Helm, Kubernetes, Vercel

Reliability & Observability: App Insights, ELK, Grafana, on-call & incident response, SLI/SLO definition, post-incident review, audit-grade test suites as deployment gates

IaC & DevOps: Azure DevOps, Bicep, Terraform, GitHub Actions, YAML pipelines, Bash/PowerShell, GitOps

Languages & Frameworks: Python, TypeScript/Node, Hono.js, Next.js, React, React Native, Swift, Java

Data & AI: Cosmos DB, MongoDB, SQL Server, Redis, Pinecone, Supabase/Postgres; Azure OpenAI, Anthropic/OpenAI/Gemini APIs, multi-provider LLM routing

EDUCATION & LEADERSHIP

Indiana University, Bloomington, IN

Aug 2018

B.S. Informatics, Minors in Computer Science and Entrepreneurship | Founded BridgehaCS in Boston (100+ students from MIT, Harvard, Brown, Cornell; \$10K raised w/ Microsoft & Twilio)
